

# Giessen Fest

CAV/LPP  
45 rue des Saints Pères  
salle H432

## Le jeudi 8 décembre / Thursday December 8th

Heure/Time	Présentations
14H30	Roland Fleming: Visual perception of transparent materials
14H45	Bilge Sayim. Transparency. It's all in the look.
15H00	Romain Vergne: Image orientations in shape perception and material design
15H15	Christiane Wiebel: On the speed of material categorization
15H30	Matteo Valsecchi: On the speed of interocular disparity processing in natural scenes and artificial stimuli.
15H45	Tom Otto. The equal effectiveness principle in parallel perceptual decisions
16H00	Pascal Mamassian. Are you talking to me? Confidence and Bayesian perception.
16H15	Andrei Gorea. Decision behavior in a sequence of two visual memory tasks.
16H30	Pause café / Coffee Break
17H00	Cristiano Cellini: Haptic flash lag effect
17H15	Patrick Spröte: Bite & Dents: The visual perception of negative parts
17H30	Luc Charmet. Crowding and attractiveness. Beauty and the group.
17H45	John Greenwood. In the zone. Crowding and saccades have similar spatial dispersion.
18H00	Doris Braun: Dynamics of oculomotor direction discrimination
18H15	Kurt Debono: Direction estimation during smooth pursuit eye movements
18H30	Jean Lorenceau. I write to you only with my eyes.
18H45	Florian Perdreau. Painting the world seen through a tube.
19H30	Dinner at Chez Fernand

## Le vendredi 9 décembre / Friday December 9th

Heure/Time	Présentations
9H00	Kevin O'Regan: The colors I see. A new sensor basis to predict color naming, unique hues, hue cancellation and hue equilibrium
9H15	Christoph Witzel: Category effects for equally discriminable colours
9H30	Karl Gegenfurtner: Lightness perception and eye movements I
9H45	Matteo Toscani: Lightness perception and eye movements II
10H00	Patrick Cavanagh. The flash grab effect.
10H15	Michael Morgan. Objects apparently moving towards one another look closer together but what determines the Weber Fraction for their spatial separation: physical or biased separation?
10H30	Alexander Schütz: Transparent motion and the perception of numerosity and depth
10H45	Elisabeth Hein. Features on the move.
11H00	Pause café / Coffee Break
11H30	Mark Wexler. Visual stability: Back to basics.
11H45	Thérèse Collins. Error signals in saccadic adaptation.
12H00	Martin Szinte. Allocation of attention across saccades.
12H15	Katja Fiehler: Spatial updating with respect to gaze without vision
12H30	Jutta Billino: Dopaminergic modulation of saccadic control
12H45	Dagmar Wismeijer: Effects of texture orientation on saccade directions.
13H30	Lunch at Café Louise
15H00	Dessert, coffee, informal but profound chit-chat at 49 rue des Saints Pères
